Why computers are like women:

Nobody understands the language that they use when they talk to other computers.

They never tell you what is wrong; and if you don't know, you're in trouble.

They remember your smallest mistakes for ever.

Why computers are like men:

They know a lot of things but they are very stupid.

After you get one for yourself, you soon see a better one.

They like to go fast but they always crash.
